

Computer Science

Class XI

1. **Revise and learn** all the covered topics again and again.
2. Make a **PowerPoint Presentation** on the chapter **Computer Introduction** covering all the discussed topics along with the help of pictures. Text matter should be limited and in brief.
3. Try to gain some knowledge about the basic concepts of our upcoming topics **Computer Programming and Python Language**. This effort will help you a lot when we start the most important part of our syllabus after holidays.
