

Computer Science

Class XII

1. **Revise and learn** all the covered topics again and again.
2. Make a **PowerPoint Presentation** on the chapter **Computer Networking** covering all the discussed topics along with the help of pictures. Text matter should be limited and in brief.
3. Do **10 Multiple Choice Questions** each on the following topics
 - Python Basics concepts
 - Python If and Loops
 - Python Strings
 - Python Lists
 - Python Tuples
 - Python Dictionaries
 - Python Functions
 - Python Modules

For MCQ you can visit the following link
<https://www.sanfoundry.com/python-questions-answers-variable-names/>

4. Go through the **short answer questions** based on chapter **Computer Networking** by visiting following link

<https://www.cbsetuts.com/chapterwise-question-bank-cbse-class-12-computer-science-c-communication-technologies/>

5. Search for a **project for the final practical exam based on python with database connectivity to my-sql**. Decide the name and register it for yourself. **3 students can work on the same project**. The project name once registered will not be allotted to any other group. It will depend on first come first basis.
6. Revise all the topics covered in class 11 from python as well as my-sql.
