Topic: Comprehension passage

Read the following Passage:-

By instinct, most parents love and care for their children. Yet, very often, their expectations and ambitions put too much pressure on the children. When Children cannot reach the level of their parent's ambition, they can suffer from tremendous frustration and stress.

This may lead to drug experimentation and other related behaviours as a way of avoiding the realities of the situation.

From the beginning, children should be allowed to develop in their own natural, happy way within the control of parental love, guidance and care and without too much pressure. A change of some conventional parental attitudes may help to prevent many cases of drug dependence and other adolescent problems.

We should also understand our parental responsibilities to the world environment. Remember that the living space of this world is limited and we must have enough space for our future generations to live happily.

Answer the following Questions:-

- 1.What is the basic nature of parents towards their children?
- 2.Why are the children under pressure due to parents?
- 3.What are the various problems children suffer from?
