Dear Readers,

Greetings to all,

We are pleased to present the next issue of GTB SNIV in the digital form. It highlights the school achievements, events & celebrations during the lockdown period.

As the Corona Virus pandemic continues its deadly path, our school has taken several leaps forward. With a positive mindset, we have created a plethora of opportunities for students and teachers to enhance their skills and competencies and become physically and emotionally resilient to face the challenges with hope and determination.

It is time to get organized, to retrospect, to reflect, & hone our creativity and also rekindle loving relationship with each other.

Let us together turn this adversity into opportunity with positivity.

Artificial Intelligence

The students of class 6, Japleen Kaur, Harmehar Singh & Rajveer Singh made E-Posters on MS-WORD using various Picture formatting tools and options. The topic was Applications of Artificial Intelligence. As we all are surrounded by Robots....the budding engineers observed various categories of such machines and how they are using it in daily life... The students came up with very innovative and creative implementation of this emerging and revolutionary branch of computers.
