

Assignment 9 Date 1/2/22 sub: Mathematics

Class 2

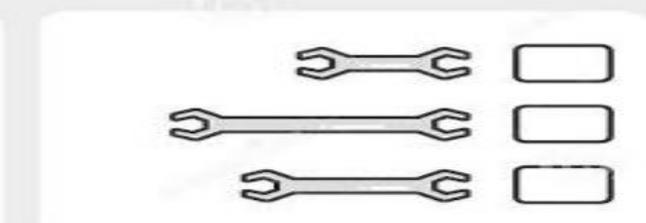

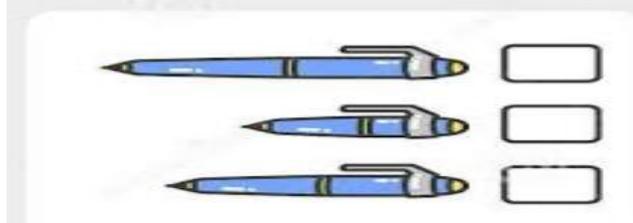

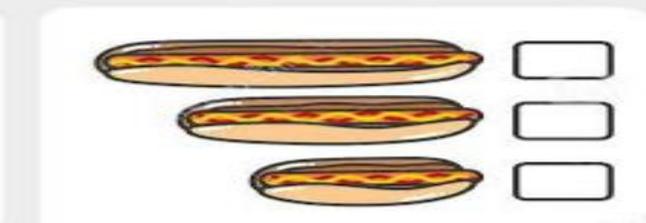

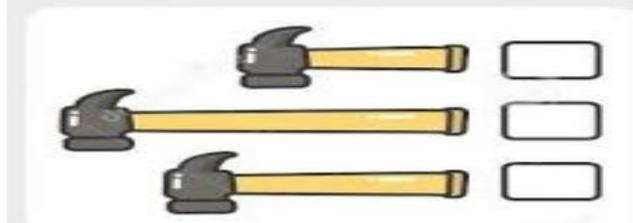

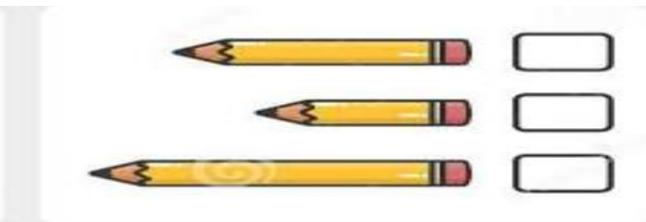

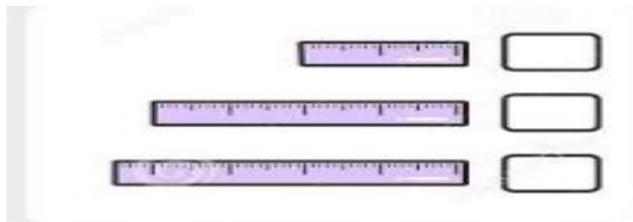

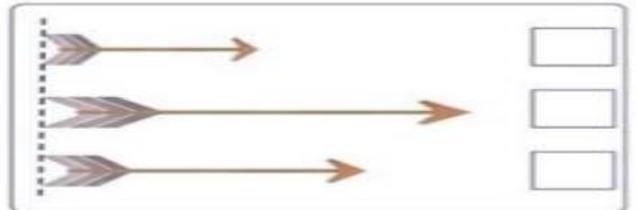

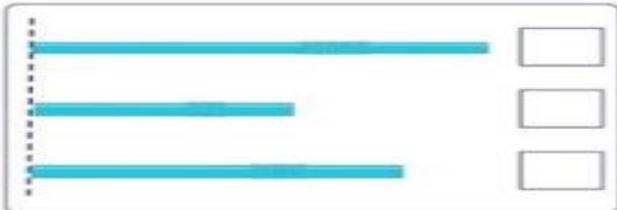

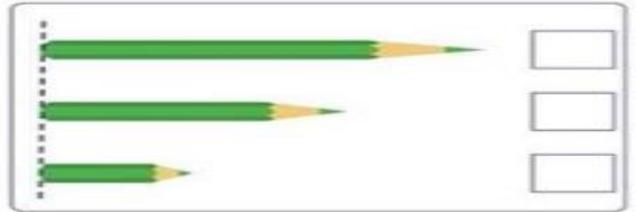

Teacher Kalpana Bawa

## Chapter 6 Measurement

### Measurement of length

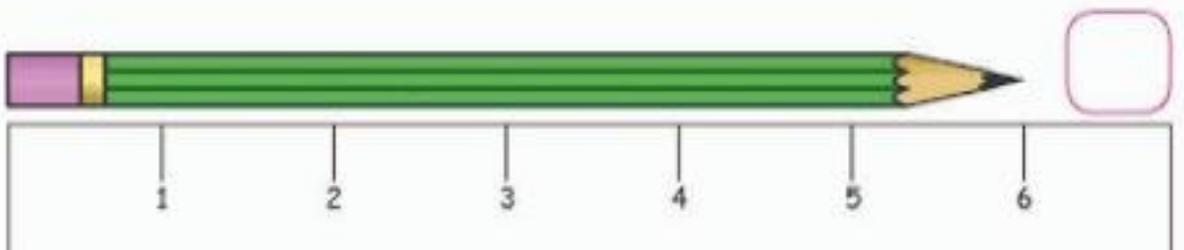

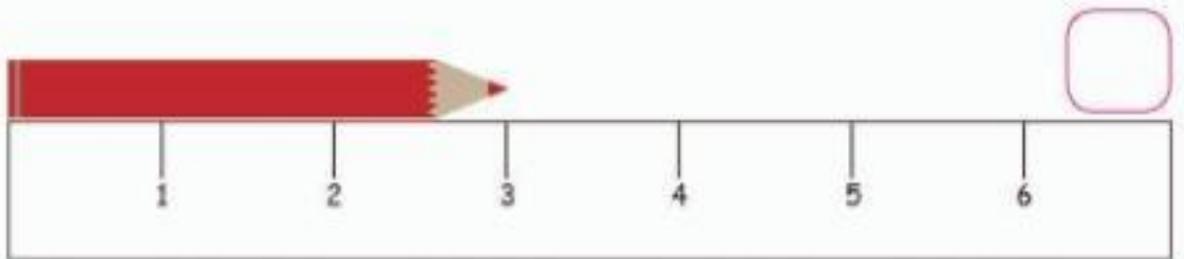

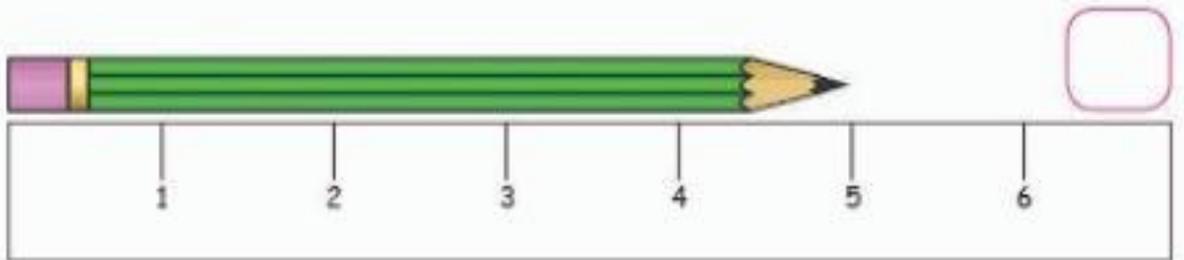

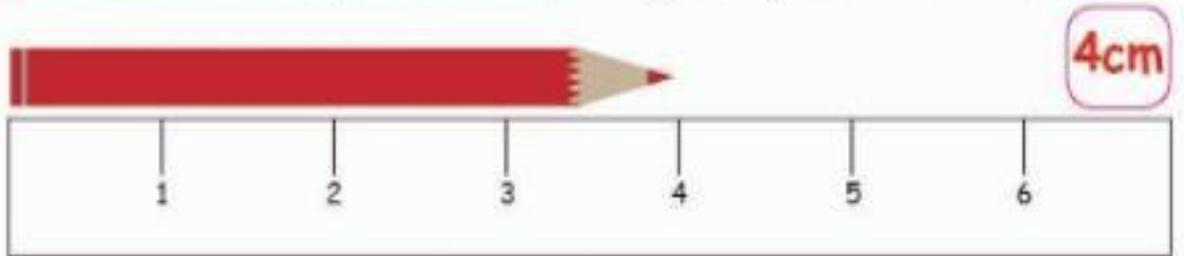

- Standard unit for length are inch , cm, m and km
- Short objects are measured in cm .
- Longer objects are measured in meter.
- Very long object or distance is measured in kilometer.
- $100\text{cm} = 1\text{m}$
- $1000\text{m} = 1\text{km}$

Q1: Compare the length of the given objects, write 1,2,3 in the blank.1 being the shortest .

Q2: Find length of the following:

1. Measure the length of each pencil (in cm.) and write in the box.

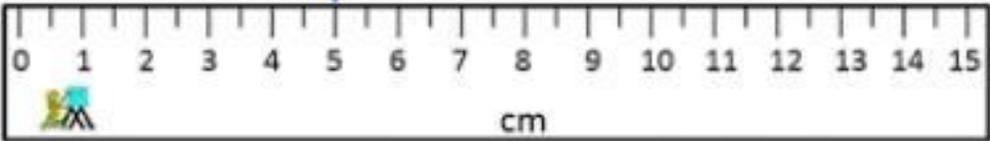

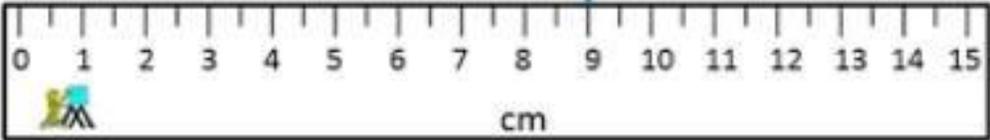

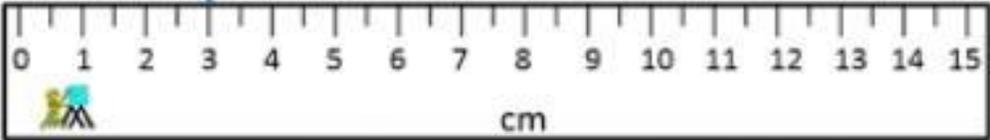

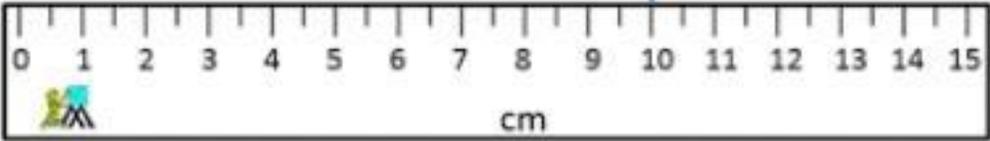

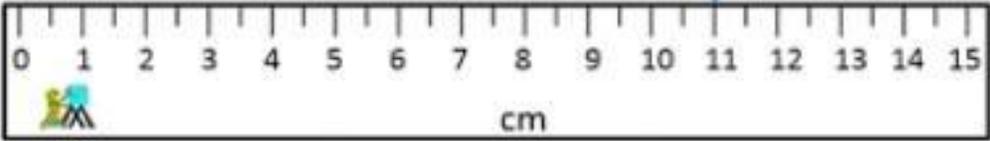

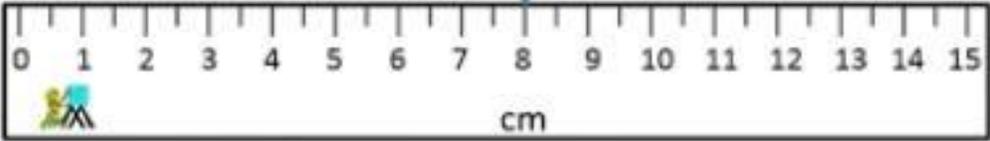

Q3 Choose the correct option cm,m,km for given objects

<p>Distance between two continents</p> 	<p>Distance of a marathon race</p> 	<p>Length of a baby's feet</p> 
<p>cm / m / km</p>	<p>cm / m / km</p>	<p>cm / m / km</p>
<p>Length of a dolphin</p> 	<p>Width of a towel</p> 	<p>Length of a sailboat</p> 
<p>cm / m / km</p>	<p>cm / m / km</p>	<p>cm / m / km</p>
<p>Size of a frying pan</p> 	<p>Length of golf course</p> 	<p>Height of door</p> 
<p>cm / m / km</p>	<p>cm / m / km</p>	<p>cm / m / km</p>

Q4

How many cm does the arrow show?

 <p>_____ cm</p>
 <p>_____ cm</p>
 <p>_____ cm</p>
 <p>_____ cm</p>
 <p>_____ cm</p>
 <p>_____ cm</p>
